# <u>INSTALLATION HELP:</u>

After double clicking the 1_python_silent_install.bat file if you are being prompted with this message:

Windows Installer

❌ This installation package could not be opened. Verify that the package exists and that you can access it, or contact the application vendor to verify that this is a valid Windows Installer package.

OK

YOU HAVE NOT EXTRACTED EthanPrice_Ellensburg_WA_FBLA_Coding UNDER C:

Most of the time, this is because when you extracted the .zip file, it created another folder with the same name. To fix this, drag the folder with the **REAL** contents out of the duplicate and onto C:\

(See Below)

Dragging Duplicate folder to C:
